TECHNICAL PROJECTS (MORE CAN BE FOUND AT: <https://github.com/LeoMartinezTAMUK>)

Context-Constrained C++ Codebase AI Agent | Python, OpenAI API, CMake, LLMs

- Engineered an autonomous AI agent for large C++ repositories, combining hybrid code retrieval, LLM ranking, strict 5,000-token context management, automated build/test execution, and compiler-error parsing.

C2TGAN-NIDS: AI-Based Network Intrusion Detection System (Published at ICAIC 2026) | Python, Scikit-learn, Keras, ML

- Designed a 5-class CNN classification system by transforming tabular network traffic (NSL-KDD) into 11x11 grayscale images, engineering a hybrid balancing pipeline (GAN + UnderSampler) to significantly improve detection rates.

ROSE-Bench: AI Agent Benchmark for C++ Compiler Repair | Python, Docker, Bash, C++, Makefile, LLMs

- Developed a domain-specific benchmark to evaluate autonomous LLM agents on C++ bug repair, curating a dataset of real-world Git issues and developing reproducible Docker infrastructure with automated Bash pipelines.

EDUCATION

Texas A&M University - Kingsville

Kingsville, TX

M.S. Computer Science (Thesis-Based) | GPA: 4.0

Jan. 2024 – May 2025

Thesis: "C2TGAN-NIDS: CNN and Conditional Tabular GAN-Based Network Intrusion Detection System"

B.S. Computer Science | Minor in Cyber Intelligence | GPA: 3.78

Aug. 2020 – May 2024

Senior Design Project: "Multi-Threat Detection" (M.T.D.) AI-based Mobile Android App

PROFESSIONAL EXPERIENCE

Science Applications International Corporation (SAIC)

Remote - Reston, VA

Senior AI/LLM Security Engineer, Partnered with **Scale AI**

May 2026 – Present

- Conduct adversarial LLM security evaluations targeting jailbreaks, prompt injection, policy bypasses, sensitive information disclosure, unsafe cyber outputs, and model reasoning failures.
- Design cyber-focused evaluation scenarios and analyze model responses for exploitable behavior, unsafe compliance, hallucinated security guidance, and recurring vulnerability patterns.

U.S. Department of Energy (DOE) - National Nuclear Security Administration (NNSA)

Remote - Livermore, CA

Artificial Intelligence Engineer, Lawrence Livermore National Laboratory

May 2025 – May 2026

- Built LLM-powered agents and evaluation workflows for 50+ C++ repair tasks, automating code generation, vulnerability checks, rebuilds, testing, logging, and patch verification to reduce manual review effort by 35%.

U.S. Department of Homeland Security (DHS)

Remote - Ashburn, VA

Cyber Threat Intelligence Intern, CBP Branch of Cyber Threat Intelligence

May 2024 – Aug. 2024

- Analyzed over 30 threat reports/events with MITRE ATT&CK-based TTP assessments, using Splunk, CrowdStrike, and Tanium to identify anomalies, support threat hunting, and provide strategic cyber recommendations.

Texas A&M University - Kingsville

Hybrid - Kingsville, TX

AI/ML Graduate Research Assistant, Department of Electrical Engineering & Computer Science

Jan. 2023 – Jun. 2025

- Developed DNN, AE, CNN and LSTM/GRU-RNN models for multi-class/binary classification tasks, collaborating with researchers on literature reviews, and reduced false negatives by 10% in multiple AI cybersecurity domains.

CVS Health

Remote - Woonsocket, RI

Software Engineer Intern, CVS Digital

May 2023 – Aug. 2023

- Developed mobile and web interface/backend enhancements to improve patient medication access, collaborating with engineers, product owners, and scrum masters in an agile production environment using Postman and Flask.

Texas A&M University - Kingsville

In-Person - Kingsville, TX

ITS Technology Advisor, Information Technology Services (ITS)

Aug. 2021 – Mar. 2024

- Resolved network connectivity issues across residential and professional workspaces, supporting ethernet infrastructure troubleshooting and escalation with TAMUK network staff.

TECHNICAL SKILLS & AWARDS

Certifications: CompTIA Security+, CompTIA CySA+, CompTIA CSAP

Skills: Python, Java, C++, JavaScript | AI Security | LLM Eval | Cybersecurity | Red-Teaming | Scripting | APIs | SQL

Tools: LangChain, RAG, MCP, Vector DBs, Git, AWS, Azure, Docker/Podman, Splunk, Wireshark, Burp Suite, Kali Linux

Honors & Awards: TAMUK President/Dean's List, AT&T Technology Award, DHS Cyber Scholarship, DOE NNSA Scholarship
